ABOUT ME

Ambitious and highly adaptable Year 2 IT-Engineering student with a deep fascination for technological development and a natural aptitude for leadership. Combines a solid technical foundation with creative problem-solving skills and a strong commitment to community impact through volunteering. Thrives in challenging environments, demonstrated by active participation in competitive hackathons. Eager to leverage a diverse skill set—spanning tech journalism, UI/UX design, and IT engineering—to drive sustainable, impactful solutions .

HACKATHON COMPETITOR

(AI HACKATHON) BY FIRST WAVE
PHNOM PENH, CAMBODIA | JULY 2026

- Conceptualized and deployed a frictionless multimodal AI copilot designed to visually analyze stagnant business inventory and instantly generate optimized marketing strategies.
- Utilized rapid development workflows, leveraging the Gemini 2.5 Flash API and Streamlit to build a functional end-to-end prototype under a strict weekend deadline.
- Drove the product vision and pitch strategy, successfully demonstrating the application's market viability through a live, working technical demonstration.

Volunteer Data Entry Assistant

MoEYS EdTech App | 2025

- Inputted, managed, and organized educational data within the official Ministry of Education, Youth and Sport (MoEYS) EdTech application.
- Played a hands-on role in ensuring the accuracy and digital accessibility of learning resources for Cambodian students.
- Contributed to the modernization of the education sector by actively supporting national digital transformation initiatives.
